Summary

With two years of Fintech experience in a startup, I am a proficient MERN Stack Developer skilled in Node.js, React.js, and Nest.js, with additional expertise in Next.js. I led complete product ownership for a live project, overseeing feature development, bug resolution, and database maintenance in high-pressure production settings.

Education

B.E/ Dayananda Sagar college of Engineering, Electronics and Communications.

Aug. 2015 to May 2020

- GPA: 6.5/10.0

Experience

Lensta Tech Pvt Ltd, Software Engineer

Bengaluru, IN

Nov 2021 to Nov. 2023

2 years

- Oversight of Loan Origination System (LOS) with a pivotal full-stack role.
- Utilized React for frontend, ensuring an intuitive user interface.
- Employed Node.js and koa.js for backend, managing logic and database communication.
- Active involvement in the entire LOS lifecycle: requirements, design, testing, deployment, and maintenance
- Prompt bug resolution for enhanced system reliability
